

...Commit

Commitment is huge at Filanc. We committed to the water and wastewater market a long time ago. Now our commitment is to be true Master Builders of water and wastewater infrastructure.

...Collaborate...

Even in the dark ages of hard-bid construction, we chose to collaborate. We chose to work with our customers to solve problems. That's our culture. It's also why we are ahead of the pack doing design-build.

**Master Builders
of Water & Wastewater
Infrastructure
since 1952.**

Construct...

Working with Filanc you get real designers, real constructors and real design-build. Your project will be delivered with skill, experience and integrity. That's our commitment.

FILANC[®]

Arizona | California | Colorado

www.filanc.com

J.R. Filanc Construction Company, Inc. (Filanc) is an integrated design-build firm focused on the water and wastewater infrastructure market since the company's founding in 1952. We are true boots-on-the-ground, self-performing constructors with generations of in-house experience. We are also engineers and pioneers in design-build delivery. Collaboration has always been prominent among our corporate values.

Design-build in the municipal water market requires a special skill set. That's why, early on, Filanc worked with the Design Build Institute of America to establish the National Water Committee and recently to form regional counterparts in the Rocky Mountains and the Western Pacific. We are committed to both design-build and our industry.

From the delivery of new facilities, to upgrades for new technology or capacity, to repair and maintenance, Filanc has the experience, integrity, capability and collaborative spirit to deliver for you. Whether working with your preferred designers or our in-house professionals, we also have the flexibility to deliver best-value, any way you define it. That's what being a Master Builder is all about.
